Please add the following new claims:

Sub H2

20. (New) A computer system emulating a television system comprising:
- a merged PC/TV receiver and selectively operable in a user selectable TV mode or computer mode;
 - a monitor connected to said computer system and operable to provide a display in each of said TV and computer modes; and
 - an alphanumeric keyboard for providing alphanumeric information to said computer system, said computer system being capable of interpreting different predetermined alphanumeric key actuations on said alphanumeric keyboard as respective channel macros associated with network channels, the combination of said computer, said monitor and said alphanumeric keypad providing a user a visual listing of networks by depicting on said monitor successive lists of network names, each list containing network names including an initial sequence of characters matching the sequence of characters as they are being entered by the user, until the user enters a select input to establish communication with the selected network;
- wherein some of said channel macros are operably associated with predetermined TV networks; and wherein at least one other channel macro is operably associated with an internet network site.

21. (New) The computer system of claim 20, wherein said user input to tune to a network is effected by actuation of a key on said keyboard.
22. (New) The computer system of claim 20, including a pointing device operable to effect said user input to tune to a network.
23. (New) The computer system of claim 20, wherein in said TV mode said PC/TV receiver monitor has a full screen display and no user accessible PC functionality and in said computer mode said PC/TV receiver has user accessible PC functionality and a video window in said monitor display.
